Subject: Could You Handle This?

Hi firstname,

It's <marketer> from URL with a little something to share...

Imagine waking up one day, like any other. You're sipping your coffee and reading the daily paper when there's a knock at the front door.

Coffee in hand, you go to open it.

Nothing.

Must be bored kids out for thrills. You look around, but don't see anyone.

You shut the door and make it halfway to the table.

The mail slot creaks open and an envelope lands on the carpet.

You pick it up. It's got your name on it, and no return address.

Inside you discover five \$20 bills. You check 'em out, and yes, they're real.

You slip the envelope in a drawer and forget about it.

The next day, you're working in the garden, and when you put the tools away, you find an envelope waiting in the garage.

Five more \$20 bills.

You wonder if it could be more than chance...

Until it happens again the next day...

And every day after that...

Maybe that's similar to what you want in your online business?

To put away the 10-hour, zero-to-show-for-it days?

What if there was a way to make a few thousand dollars, starting with what you know today?

Something that didn't need a 30 pound manual or a programming degree to figure out?

A method that lets you start small, and then build when YOU want to?

You should check out...

In The \$100 a Day Challenge, I invited top internet marketers like James Jones, Jason Fladlien, Rachel Rofe, and others to share their exact strategies for making \$100 a day, in 30 days or less.

The catch?

They would have to do it with...

-- NO money -- NO list -- NO websites -- NO affiliates
-- NO JV partners -- NO fancy software

Here's some of the sneaky secrets they let me in on...

-- The real reason why most "newbies" never make a dime on the internet

-- How to laser-target offline businesses willing to cut you a fat paycheck for the most basic online services

-- How to transform a simple \$7 ebook into a \$1000-a-head webinar training

-- And more!

And you can use all these secrets for less than the cost of a night out.

What do you say?

You can start by applying a few strategies at a time (wait 'til you see the Specializer method...)

If you want to expand by implementing a few more, you're welcome to do that too, whether you'd like to expand (or replace) your current income.

In the next 30 days, if you find this under-the-radar training isn't for you, just tell me, and I'll refund every dime, no arguments.

Your future is all up to you.

Isn't that what you've been waiting for?

What would an extra \$100 a day do for you?

Worries about "surprise" repairs would be gone...

If the kids need equipment to take up music or an extra sport, no problem...

Going window shopping would mean actually BUYING something for once...

And you get the keys to unlock everything in 5 hours of MP3 audio and 179 pages of word-for-word transcripts.
